1.1 About Nakisa

NAKISA®'s passion is to create intuitive software solutions for Organizational Design and Lease Administration to assist global organizations in making smarter decisions faster. Unlike other 3rd party software vendors, we fully leverage your current ERP data giving you insights you never had access to before.

A global leader in enterprise business solutions for [Human Capital Management](#) (HCM) and [Finance](#), Nakisa delivers innovative, forward-thinking and robust [human resource](#) and [financial management](#) solutions that advance your business strategies.

See what's possible with Nakisa's powerful visualization technology to:

- Align talent performance with company objectives
- Stimulate employee engagement throughout your organization
- Comply with IFRS standards for Revenue Recognition and Lease Accounting

For more information, visit www.nakisa.com.

1.2 About Nakisa Hanelly Insights

Built on next generation engine analytics, Nakisa Hanelly Insights is the next leap forward in Nakisa technology. Using this technology as the base for our new suite of products, Nakisa Hanelly Insights capitalizes on machine learning technology, providing constant development. This includes progress into areas like predictive analysis and forecasting.

NakisaHanelly Insights enables the end user to:

- View new sets of data and add customized charts and filters for targeted data analysis
- Base that data on their specific needs and preferences
- Utilize preconfigured integration with existing Nakisa platforms and solutions for fast access and enablement

The engine behind Nakisa Hanelly Insights is built using native cloud architecture, and the data integration uses a powerful custom built ETL (Extract, Transform, and Load) tool in the cloud, which, among other things, enforces data quality and consistency standards on the data, allowing the solution to make sense of the information and provide actionable insights.

1.3 About this Document

The *Release Notes* are intended for Nakisa consultants, system administrators, and managers who are familiar with the deployment and configuration of Nakisa applications.

This document provides the following information:

- New features and enhancements since the last release
- Known issues

1.4 Related Documentation

The following documentation is provided in addition to this guide:

- The *User Guide* includes information on features and functions available in the User Console.

1.5 Technical Support

If you require standard product support for Nakisa applications, contact Nakisa Support through the support portal at <https://www.nakisa.com/support>. If you do not have a login to the support portal, send an email to support@nakisa.com.

Support technicians provide information and assistance in the following areas:

- Setup and installation or deployment of Nakisa applications
- Data connectivity
- Daily use errors
- Upgrading to newer versions

The annual maintenance fee does not cover:

- End-user support.
- Hardware
- Third-party software

2

Known Issues

This section lists the known issues for this release.

2.1 Known Issues	5
------------------	---

2.1 Known Issues

The following table lists the known issues in Hanelly Insights 2020.R2:

Reference Number	Description
HIN-54	When using the River Theme in a quarterly chart, the time axis displays specific dates instead of quarters. For example, the data for the second quarter is displayed under the second month.
HIN-67	If a position has multiple incumbents, the Position Search Results page and Position Directory only display the first incumbent.
HIN-137	When exporting Employee and Position Search Results to Excel, the application exports all records instead of only the ones displayed on the Search Results page.
HIN-145	In the Chart Options for bar charts, the option  to filter data based on a selected area does not currently update the Filter panel. Use the Filter panel directly to apply filters to the dashboard.
HIN-156	When customizing a chart and editing the Default Color Ranges, if the user selects a color and clicks the green checkbox before clicking OK, the RGBA value is not set. Make sure to correctly click OK before the green checkbox to properly add the color range.
HIN-159	On the Gender Equality Analysis Overview page, the "Employees on Maternity Leave with Increase" chart displays "Oops!" instead of 0 when there is no data to display.
HIN-182	After loading Hanelly Insights from Hanelly, if the user leaves the Hanelly tab open without staying active in it, the user is eventually logged out both applications. To avoid being logged out of Hanelly Insights, close the Hanelly tab.
HIN-184	While editing Info Card and Metric charts, changing the text alignment has no effect on the text. While editing Line charts, changing the text alignment appears to update the title in the preview, but has no effect once the chart is saved.
N/A	Accessibility mode is not fully functional, as there are some issues with the data displayed and available actions.
N/A	Keyboard accessibility is not fully functional, as navigation to some sections of the user interface is not available.
